

## EB2017 International Forum–Korea

### “Metabolic imprinting and Nutrition: Critical Periods of Early Development”

It is a great honor and pleasure announcing the EB 2017 International Forum-Korea with the theme of “Metabolic imprinting and nutrition: Critical periods of early development”. This event will be held on April 23, 2017 from 3:00 – 4:30 PM at S105A, McCormick Place Convention Center in Chicago.

There has been growing evidence of close relation between nutrition and metabolic reprogramming, prenatal and postnatal nutrition in terms of an increased risk of adult-onset health conditions such as obesity and cancer. In our Korean international forum, we would like to hear a recent progress and share up-to-dated knowledge on these topics with Korean researchers in both Korea and USA.

This program will provide a great networking opportunity with internationally prominent scholars, specialists and researchers attendance for this event.

We are looking forward to seeing you in Chicago in this Spring!
